

## eBreathie: Leading Disruptive Innovators in Asthma, Announces Participation in EIT Health's InnoStars Awards 2023 and Patient Innovation Bootcamp 2023

Lisbon, July 10, 2023 – eBreathie, a groundbreaking company at the forefront of respiratory disease management, is proud to announce its participation in two highly prestigious programs organized by EIT Health, Europe's largest healthcare innovation network. The company's commitment to revolutionizing respiratory healthcare and its mission to prevent asthma attacks have garnered recognition, earning them a place in the *InnoStars Awards 2023* and the *Patient Innovation Bootcamp 2023*.

The *InnoStars Awards 2023*, hosted by EIT Health, aims to support early-stage startups with transformative potential in healthcare. eBreathie's inclusion in this renowned competition highlights the company's pioneering approach to respiratory diseases and its dedication to bringing innovative solutions to patients and healthcare professionals. With a focus on improving the quality of life for millions affected by asthma, eBreathie's team members have consistently demonstrated their commitment to making a lasting impact in this field.

eBreathie has also been selected for the esteemed *Patient Innovation Bootcamp 2023*. This program brings together a select group of entrepreneurs, healthcare professionals, and industry experts to foster collaboration and accelerate the development of patient-centric solutions. As a participant, eBreathie will gain invaluable insights, mentorship, and access to a network of healthcare innovators who share a common goal of improving patient outcomes and empowering individuals with respiratory conditions.

Comprising a team of visionary entrepreneurs, eBreathie has set out to disrupt the respiratory healthcare landscape by developing a cutting-edge smart inhaler. Their comprehensive understanding of the challenges faced by individuals living with asthma has empowered them to create a product that addresses the root causes of asthma attacks and uncontrolled disease. By leveraging advanced sensors, machine learning algorithms, and personalized data insights, eBreathie strives to monitor asthma progression and detect asthma attacks even before patients show intense symptoms. With their groundbreaking solutions and determination to make a difference, eBreathie is poised to revolutionize the field of respiratory diseases and set new standards for patient care.

Speaking about eBreathie's participation in these programs, the three female founders expressed their enthusiasm and shared their vision for the future. "We are thrilled to be part of EIT Health's InnoStars Awards and Patient Innovation Bootcamp. These opportunities provide us with the platform to showcase our disruptive technologies and establish valuable connections within the healthcare ecosystem," said Ana Rita Constante. "Our mission is to put an end to asthma attacks by delivering an innovative solution that empowers both patients and doctors and revolutionizes the management of respiratory diseases," added Ana Filipa Rebelo.

**About eBreathie:** eBreathie is a Lisbon-based B2B startup creating a medical device that is changing the lives of asthma patients everywhere through a physical device, a mobile app and a clinical platform, revolutionizing how these patients and their doctors manage and monitor their disease.
